PROFESSIONAL SUMMARY

Data Engineer with 3+ years building scalable ETL/ELT pipelines on AWS and Spark. Skilled in Customer 360, Risk, and Compliance Analytics across Telecom and Finance.

TECHNICAL SKILLS

Programming: Python, SQL, PySpark

Big Data: Apache Spark (Core, SQL, Structured Streaming), Apache Kafka, Hadoop (HDFS), Hive

Cloud (Primary): AWS (S3, EMR, Glue, Redshift, Lambda, IAM)

Cloud (Exposure): Azure (ADLS, ADF, Databricks), GCP (GCS, Dataproc, BigQuery)

Data Engineering: Batch & Real-Time ETL/ELT, Data Modeling (Star/Snowflake Schema), Data Warehousing, Data Lake Architecture, Data Quality Frameworks, Schema Evolution, Checkpointing, Watermarking

Databases: Cassandra, HBase, Hive Metastore, BigQuery, Redshift

Orchestration: Apache Airflow, Azure Data Factory

BI & Reporting: Tableau, Power BI

PROFESSIONAL EXPERIENCE

Data Engineer — Wells Fargo, San Francisco, CA

Feb 2025 – Present

Real-Time Fraud Detection & Customer 360 Analytics

- Built batch ETL pipelines integrating loans, deposits, and card data into a unified AWS lake.
- Designed Customer 360 datasets supporting credit risk, exposure, and compliance reporting.
- Implemented reconciliation and validation checks ensuring audit and regulatory data accuracy.
- Optimized large-scale Spark joins and aggregations for high-volume financial datasets.
- Automated data workflows with Apache Airflow to meet regulatory reporting deadlines.
- Partnered with risk, fraud, and compliance teams to deliver analytics-ready datasets.

Junior Data Engineer — Reliance Jio Infocomm Ltd., Hyderabad, India

Dec 2021 – Jun 2023

Real-Time Recharge & Batch Usage Processing

- Built Spark batch ETL jobs processing CDR, SMS, and internet usage logs for billing systems.
- Designed daily aggregation pipelines computing subscriber-level usage metrics.
- Applied watermarking and checkpointing to handle late-arriving, out-of-order events.
- Optimized Spark transformations and joins to meet SLA timelines on telecom datasets.
- Managed Apache Airflow workflows automating and monitoring batch processing jobs.
- Monitored production pipelines, resolved failures, and ensured high availability at peak load.

PROJECTS

Real-Time Streaming Pipeline — Kafka & Spark Streaming

- Built a real-time ingestion pipeline using Kafka to stream clickstream events into Spark Structured Streaming.
- Applied watermarking and windowed aggregations; persisted results to S3/Redshift for analytics.

End-to-End Batch ETL Pipeline on AWS with Airflow

- Built a batch ETL pipeline extracting data from a public API into an AWS S3 data lake using PySpark on EMR.
- Modeled a Star-Schema warehouse in Redshift, orchestrated with Airflow, and visualized in Tableau.

EDUCATION

Master of Science in Management – Data Analytics

Indiana Wesleyan University, Marion, Indiana | Aug 2023 – Apr 2025

Bachelor of Technology – Mechanical Engineering

Sri Indu College of Engineering & Technology, Hyderabad, India | Aug 2017 – Jul 2021

CERTIFICATIONS

Academy Accreditation - Databricks Fundamentals, Databricks

Digital Skills - Artificial Intelligence, FutureLearn
